

oneIDentity+

The potentials of serialization

Product piracy, Traceability and Digitalization Industry 4.0 are challenges affecting all manufacturers and markets. oneIDentity+ helps you to face them.

Besides the protection against counterfeits, traceability of products and mobile access to data is gaining in importance. oneIDentity+ is a manufacturer-independent service platform to support role-specific mobile processes. It allows the tracking of products, the display of product, marketing, and maintenance information, the connection to customer loyalty systems etc. All this is based on the standardized marking of articles and packages with a unique code. By using the oneIDentity+ app, you, all those involved in the value chain, and your customers can scan this code and gain access to target-group-specific information and value added services – worldwide, 24 hours per day.

Who can use oneIDentity+?

- Manufacturers from different industries use oneIDentity+ to distinctly mark their products and offer mobile services on top.
- The manufacturer-independent oneIDentity+ iOS and Android App is available for everybody worldwide and is free of charge.
- While non-registered App users can use it mainly to check the authenticity of products and machinery registered users like mechanics in garages, customs officers, service and logistics employees profit from additional value-added services.
- Authenticity checks can also be carried out at www.one-identity-plus.com and several manufacturer webpages.
